---

## Anvil Guide

**\* OPTIFINE REQUIRED \***

### FIRST OF ALL, CHECK YOUR SETTINGS (QUALITY):

- Emissive Textures: **ON**
  - Custom Items: **ON**
  - Custom Sky: **ON**
  - Custom Entity Models: **ON**
  - Custom Colors: **ON**
  - Custom GUIs: **ON**
- 

Welcome to the **Anvil Guide**!

Through an anvil you can rename any **shield, sword, armor, bow, crossbow or tool** with a **specific name** to modify its **appearance and size**. There are so many weapons created by my friends and me, some weapon textures can be **between 16 and 512 pixels or 3D models**. In addition, if a bow has the **Flame enchantment**, **fire will appear in the sprite** when aiming. *Hardt's Armory* also includes a lot of weapons from **Minecraft Dungeons**.

► To **customize** an item / weapon, **place it on an anvil and rename it**.

If you **don't have the Resource Pack** yet, you can download it [here](#).

Also, you can see **all the contents of the resource pack** inside the [test world](#).
